To the right of the header is a search bar with the placeholder text 'Search for help with...' and a magnifying glass icon. Below the header, the article title 'Adding, Editing, and Removing Media Work Samples on Your Profile' is displayed in a bold, black font. The main content area contains a paragraph explaining that users can display work samples like documents, photos, sites, videos, and presentations on their profiles, and that these can be edited or deleted. A section titled 'Adding or linking to work samples on your profile' is expanded, showing a list of seven steps: 1. Click the '@ Me' icon at the top of your LinkedIn homepage. 2. ## Visibility of Your Updates, Posts, and Activity

Your **Activity** shows all recent posts you've shared on your LinkedIn feed and changes you've made to your profile. These posts may be visible to other members depending on your settings.

### Visibility of LinkedIn feed posts

When you share a post on your LinkedIn feed, you can choose whether to share your post publicly or to your connections only. If you share a post publicly, or if you like or comment on a public post, this will be visible on your **Activity** to all LinkedIn members. If you share a post to your connections only, or if you like or comment on a post visible to your connections only, this will only be visible to your connections when they view your **Activity** on your profile. Learn how to [change the visibility of the posts you share](#).

### Visibility of profile updates

When you make an update to your profile or hit a professional milestone such as a work anniversary, these updates are visible to your connections on your **Recent Activity**. In addition to showing on your **Recent Activity** on your profile, these updates may also be broadcast to your connections through the LinkedIn feed and other channels.

You can also [adjust whether your network is notified about profile changes](#) from your **Settings & Privacy** page or check out more information about [sharing profile changes with your network](#).

### Changes to your LinkedIn account that may trigger updates

- Adding or editing a new, current job position. This may generate a "Say congrats" notification to your network.
- Current work experience anniversaries.
- Birthday anniversaries.

LinkedIn no longer displays work anniversaries and birthdays of your connections in your LinkedIn feed. Instead, you'll receive these updates on the Notifications page.

**Note:** Turning off the [option to share profile edits](#) eliminates notifications about changes to a member's profile to their network. It does not hide the **Activity** section from your profile.

Your LinkedIn activity determines the kind of content you view in your feed. Learn more about the [visibility and impact of your social activity on your LinkedIn feed](#).
